## a scented music box

When winter turns into spring, the beauty hidden under snow appears. Trees grow and flowers bloom, bringing out the enchanting colour of spring. Birds sing and glide in gentle breeze that sweeps leaves into the sky, creating a melody of nature and April's fresh air.

Harriet Elizabeth Prescott Spofford defines the beauty of spring as:  
"A gush of bird song, patter of dew  
A cloud and a rainbow's warning;  
Suddenly sunshine and perfect blue  
An April day in the morning"

# The Luxury

Roses can be traced back to 70 million years ago. In Greek and Roman mythologies, roses are the symbols of love and beauty. They are also identified with the birth myth of the goddess Venus or Aphrodite. It is said that the goddess's tears fell down to the ground and fused with the blood of her lover 'Adonis' who were killed by wolves. The blood and tears on the ground then turned into a dark red flower – a rose.

The beautiful design of the package is inspired by the Greek and Roman classical architecture and the rose myth. The glass bottle is shaped like a Roman column with a delicate rose made from Sesbania in pastel shades to convey the fantasy and romantic feelings.

We put the best quality of two components together: the flower sweetness, softness and the cool elegance of metal. Designed in a contemporary pattern, Makoto stands out from our previous collections. Titanium is a metal with a unique property. We found a way to use its cool but elegant feel by coating it on our products. The using of Titanium for fragrance products is complicated and has never been done. It guarantees that this is the experience you cannot find elsewhere.

To make the tree strong but wavering, we have to separate it into three layers; layer by layer from the bottom to the top, we carefully create the white pine tree the way we want.
